ABM

Singapore ABM project

Address: Singapore

Investor: Singapore AUTOBAHN MOTORS(S) PTE LTD

Parking System: Parking Tower (PCS); 15 levels above ground

Transfer cabins: 2

Parking spaces: 60

Project Description:

This Parking Tower is part of the Singapore ABM main building to store luxury cars for sale and lease. It is a tailored system and designed to park all brands and models of sports cars up to 2.8 tons.

ABM is committed to the sale and leasing business of various kinds of luxury cars. The parking building tailored by Yeefung meets the demand for parking spaces while adopting the full-glass exterior facade to fully display the luxury cars. Through the connection with the Yeefung parking system, customers can remote display and reservation access of vehicles on ABM's private network, and realize self-service vehicle rental services.

Comparing with the limited display space of traditional exhibition halls, this Yeefung parking tower significantly increase the number and effectiveness of display. Combined with the overall architectural design and the parking height advantage, it achieved the company publicity and promotion purposes.
